

Exposure of inadmissible-evidence settlements that clear (\$200 per defective settlement; permissive baseline vs RAILS)

Anchors: avg chargeback ~110US/120 travel; card fraud 6.43c per 100(Nilson2026); *disputecost*9-10 (Mastercard 2025). Approval-impact pairing: this permissive baseline declines only 2% of legitimate work but carries the exposure above; RAILS' fixed-ATT floor over-declines, which the exposure-variable floor recovers (fig_variable_floor).
